Dear Hiring Manager,

I am excited to apply for the **Full Stack Engineer** position at **[]**. Currently, I am a member of CodeSupport, where I actively share knowledge and assist fellow developers with technical challenges. This experience has not only honed my collaborative skills but also kept me updated with the latest in software development.

Recently, I had the opportunity to intern at Balai Spektrum Frekuensi Radio, where I was involved in monitoring radio frequency spectrum compliance. This role deepened my understanding of technical documentation and teamwork in a regulatory context. Alongside my contributions to community discussions in various developer groups, I have consistently engaged with cutting-edge technologies and programming practices.

My involvement with Discord Developer and DevCord has further solidified my capacity to contribute effectively to dynamic projects, as I have collaborated on developing bots and integrating APIs. These experiences have equipped me with a solid foundation in software development, making me well-prepared to tackle the challenges at **[]**.

I am particularly drawn to this role because of the opportunity to work on large-scale systems and push the boundaries of technology. I am eager to bring my skills to your team and contribute to creating innovative, user-focused solutions.

Thank you for considering my application. I look forward to the possibility of contributing to **[]'s** mission.

Best regards,

Alpian

PayShare

PayShare is a web-based application designed to make it easier to manage split costs within groups—whether roommates, families, communities, or project teams.

TimeSync

TimeSync is an application/web tool designed to automatically synchronize time between devices or systems—to ensure system clocks remain accurate and in sync.

Event-rsvp

Event RSVP is an application/web platform designed to help organize events by managing participant registration (RSVP — "Répondez s'il vous plaît") and event management digitally.

Link-hub

Link-Hub is a web application/metaportal that allows users to easily manage, organize, and share their personal collection of links—similar to the concept of a "link in bio" or single-link profile page.

Formify

Formify is a modern, comprehensive platform for building, managing, and analyzing online forms. It's designed to meet the needs of teams and organizations looking to automate data collection, team collaboration, and response management with a modern, reliable, and easy-to-use interface.

AdminKit

AdminKit is an enterprise-grade admin dashboard, built with cutting-edge technologies (Next.js 15, React 19, TypeScript, and ShadCN UI) to provide a single, modular, professional solution for back-office management of medium to large-scale applications.

KamusKenyah-Translator

KamusKenyah-Translator is a dictionary and translation application specifically for Kenyah (a Dayak Kenyah language) to Indonesian (and/or vice versa). This project aims to support the preservation of regional languages, facilitate access to learning and translating Kenyah vocabulary, and serve as an open source for further development.

BookHaven

BookHaven is a digital library management system (e-library) application designed to facilitate the process of borrowing, book management, and user interaction in a modern library environment.
